

TON THAT GIA HUY

Data Engineering & Backend Intern

tonthatgiahuy160505@gmail.com | 0357 177 029 | Ho Chi Minh City | [LinkedIn](#) | [GitHub](#)

PROFILE

Final-year Data Science student focused on Data Engineering and backend systems. Builds Python data pipelines and APIs with PostgreSQL, PySpark, FastAPI, Docker, automated tests, and CI. Seeking Data Engineering or data-focused Backend internship and fresher opportunities.

EDUCATION

University of Transport Ho Chi Minh City (UTH)

2023–2027

Bachelor of Data Science · GPA: 3.0/4.0

PROJECTS

CloudMentor AI — Data Ingestion & Lifecycle

Personal project · 2026–Present · [GitHub](#)

- Built a modular PDF ingestion flow: Extract → Transform → Chunk → Embed → Index.
- Connected PostgreSQL/SQLAlchemy lifecycle states (UPLOADED → PROCESSING → INDEXED/FAILED) with traceable Chroma metadata.
- Added file and input validation plus automated unit and API tests in GitHub Actions CI.

Social Media Sentiment Big Data Pipeline

Coursework project · Jan–May 2026 · [GitHub](#)

- Processed approximately 1.6M Sentiment140 records in a local PySpark batch workflow with text cleaning, partitioned Parquet, and HDFS.
- Compared Spark ML models and exposed saved analytics through FastAPI endpoints backed by MongoDB.
- Built a separate synthetic Kafka streaming demo and Airflow scheduling prototype, distinct from the batch path.

TECHNICAL SKILLS

Programming & Backend: Python, SQL, FastAPI, REST APIs

Data Engineering: ETL, data modeling, PySpark, Kafka fundamentals, HDFS, Parquet

Databases & Tools: PostgreSQL, MongoDB, Chroma, Docker, Git, GitHub Actions, pytest, Alembic

CERTIFICATION

Databricks Fundamentals Accreditation — Databricks Academy, Sep 2026

LANGUAGES

English: Technical reading and working communication
